## Other Businesses

Our other businesses segment has been transitioned to “Noah Digital International”, and to provide more comprehensive services and investment products to our clients.

Ms. Jingbo Wang, co-founder and CEO of Noah, said, “Despite the market volatilities we experienced, Noah delivered record high net revenues in the fourth quarter of 2021. Total net revenues rose by 29.9% year-on-year, supported by higher one-time commissions, recurring service fees and performance based income. Our internal strategic investments into digitalization, talent acquisition and client services were all in line with the budget, and helped the Group to report a non-GAAP net income of RMB1.4 billion for the full year, exceeding the higher end of the guidance we had expected. Our clients remained active, with the number of total active clients increased by 25.0% year-on-year in 2021, and I am very happy to see the number of diamond card and black card clients grew 18.2% in 2021, indicating the positive results of our upgraded Noah Triangle client service model and our “client-centric” reform. I remain confident in Noah’s capabilities and that our reform will help to gain more market share and core clients, as well as set a solid structural foundation for long-term growth.”

<sup>5</sup> The allocation/redemption of public securities also includes market appreciation or depreciation.

<sup>6</sup> Since the first quarter of 2021, we reclassified all remaining mezzanine financing products linked to corporate merger and acquisitions and buy outs from credit to private equity in the amount of RMB4.7 billion, considering its nature is more akin to equity than credit. We have also revised the comparative period presentation to conform to current period presentation.

## NOTE TO FINANCIAL INFORMATION

As of the date of this press release, we are still in the process of reviewing the financial results of the funds of funds we manage and invest in as the general partner or manager. Any changes in the fair value of those investments could affect the income from equity in affiliates, net income, net income attributable to Noah shareholders, income per ADS and the balance of investments in affiliates in our consolidated financial statements. While not included in the unaudited preliminary fourth quarter 2021 financial results in this press release, we will include any such fair value adjustments in the audited consolidated financial statements in our 2021 Form 20-F and will make a subsequent announcement when our review concludes, as appropriate.

## 2022 FORECAST

Although the pandemic continued to impact the distribution of offshore insurance products and the market remain volatile, the Company is happy to see a growing demand in domestic insurance products, a higher performance based income from PE/VC products we previously distributed, a stabilized AUM after a successful standardization transformation, as well as an increase in diamond and black card clients. Therefore, we are reasonably optimistic about the growth in the number of core clients, net revenues as well as take rate in 2022. Meanwhile, we remain committed to our investments in technology, investment research capabilities and talents to realize growth potentials and capture market opportunities. Given the above considerations, the non-GAAP net income attributable to Noah shareholders for the full year 2021 will be in the range of RMB1.45 billion to RMB1.55 billion. This forecast reflects management's current business outlook and is subject to further change.
