SECOND QUARTER 2015 FINANCIAL RESULTS

Net Revenues

Net revenues for the second quarter of 2015 were US\$93.2 million, a 30.4% increase from the corresponding period in 2014, primarily due to increases in one-time commission revenues, recurring service fees and performance-based income.

- **Wealth Management Business**
 - **Net revenues from one-time commissions** for the second quarter of 2015 were US\$35.7 million, a 56.4% increase from the corresponding period in 2014, primarily due to an increase in the aggregate value of the wealth management products distributed by the Company.
 - **Net revenues from recurring service fees** for the second quarter of 2015 were US\$25.0 million, a 3.2% increase from the corresponding period in 2014, mainly due to the cumulative effect of finance products previously distributed by the Company with chargeable recurring service fees, which was partially offset by the impact of lower recurring service fee rates due to a change in product mix.
 - **Net revenues from other service fees** for the second quarter of 2015 were US\$11.9 million, a 1,338.1% increase from the corresponding period in 2014, primarily consisting of performance-based income received for secondary equity market fund products distributed by the Company.
- **Asset Management Business**
 - **Net revenues from recurring service fees** for the second quarter of 2015 were US\$13.0 million, a 12.3%

increase from the corresponding period in 2014, primarily due to the increase in assets under management by the Company, partially offset by the impact of lower management fee rates due to a change in composition of asset types under management.

- **Net revenues from other service fees** for the second quarter of 2015 were US\$4.7 million, primarily consisting of performance-based income received for managing funds of secondary equity market funds. Performance-based income decreased by 58.8% compared with the corresponding period in 2014, due primarily to the timing of performance-based income from real estate funds being recognized. We received US\$11.4 million performance-based income along with the full realization of performance-based income from the maturity of two real estate funds managed by us during the second quarter of 2014.

- **Internet Finance Business**

- **Net revenues for the second quarter of 2015** were US\$2.8 million, a 489.7% increase from the corresponding period in 2014, primarily because this is a new and fast growing business segment for the Company.

Operating costs and expenses

Operating costs and expenses include compensation and benefits, selling expenses, G&A expenses, other operating expenses and government subsidies. Operating cost and expenses for the second quarter of 2015 were US\$62.0 million, a 43.6% increase from the corresponding period in 2014.

In the second quarter of 2015, relationship manager compensation increased by 60.3% from the corresponding period in 2014, reflecting an increase in the aggregate value of financial products distributed and an increase in commission rate to relationship managers driven by the change in product mix. Other compensation for the second quarter of 2015 increased by 55.4% from the corresponding period in 2014, primarily due to increases in both the number of back-office employees and share-based compensation.
- **Selling expenses** for the second quarter of 2015 were US\$7.2 million, a 45.7% increase from the corresponding period in 2014, primarily due to increased general marketing expenses resulting from an increase in the Company's marketing efforts, as well as increased training expenses and rental fees.
- **G&A expenses** for the second quarter of 2015 were US\$2.6 million, a 5.0% decrease from the corresponding period in 2014.
- **Other operating expenses**, which include other costs incurred directly in relation to the Company's revenues, for the second quarter of 2015 were US\$0.9 million, an increase of 43.6% from the corresponding period in 2014. The increase was primarily due to the growth of other businesses within the wealth management segment.

- **Selling expenses** for the second quarter of 2015 were US\$0.8 million, a 64.3% increase from the corresponding period in 2014.
- **G&A expenses** for the second quarter of 2015 were US\$1.5 million, a 16.9% decrease from the corresponding period in 2014, primarily due to decreased consulting fees.

- **Wealth Management Business**

Operating margin for the second quarter of 2015 was 37.6%, compared to 35.8% for the corresponding period in 2014. The increase was mainly due to higher growth rate of net revenues than of operating costs and expenses in the second quarter of 2015, compared to the corresponding period in 2014.

- **Asset Management Business**

Operating margin decreased to 50.8% for the second quarter of 2015 from 53.2% for the corresponding period in 2014. The decrease was primarily because the Company received less performance-based income in the second quarter of 2015, compared to the corresponding period in 2014.
